

AUSTRALIAN VALVE AND ENGINEERING

The specialists
in valve
reconditioning

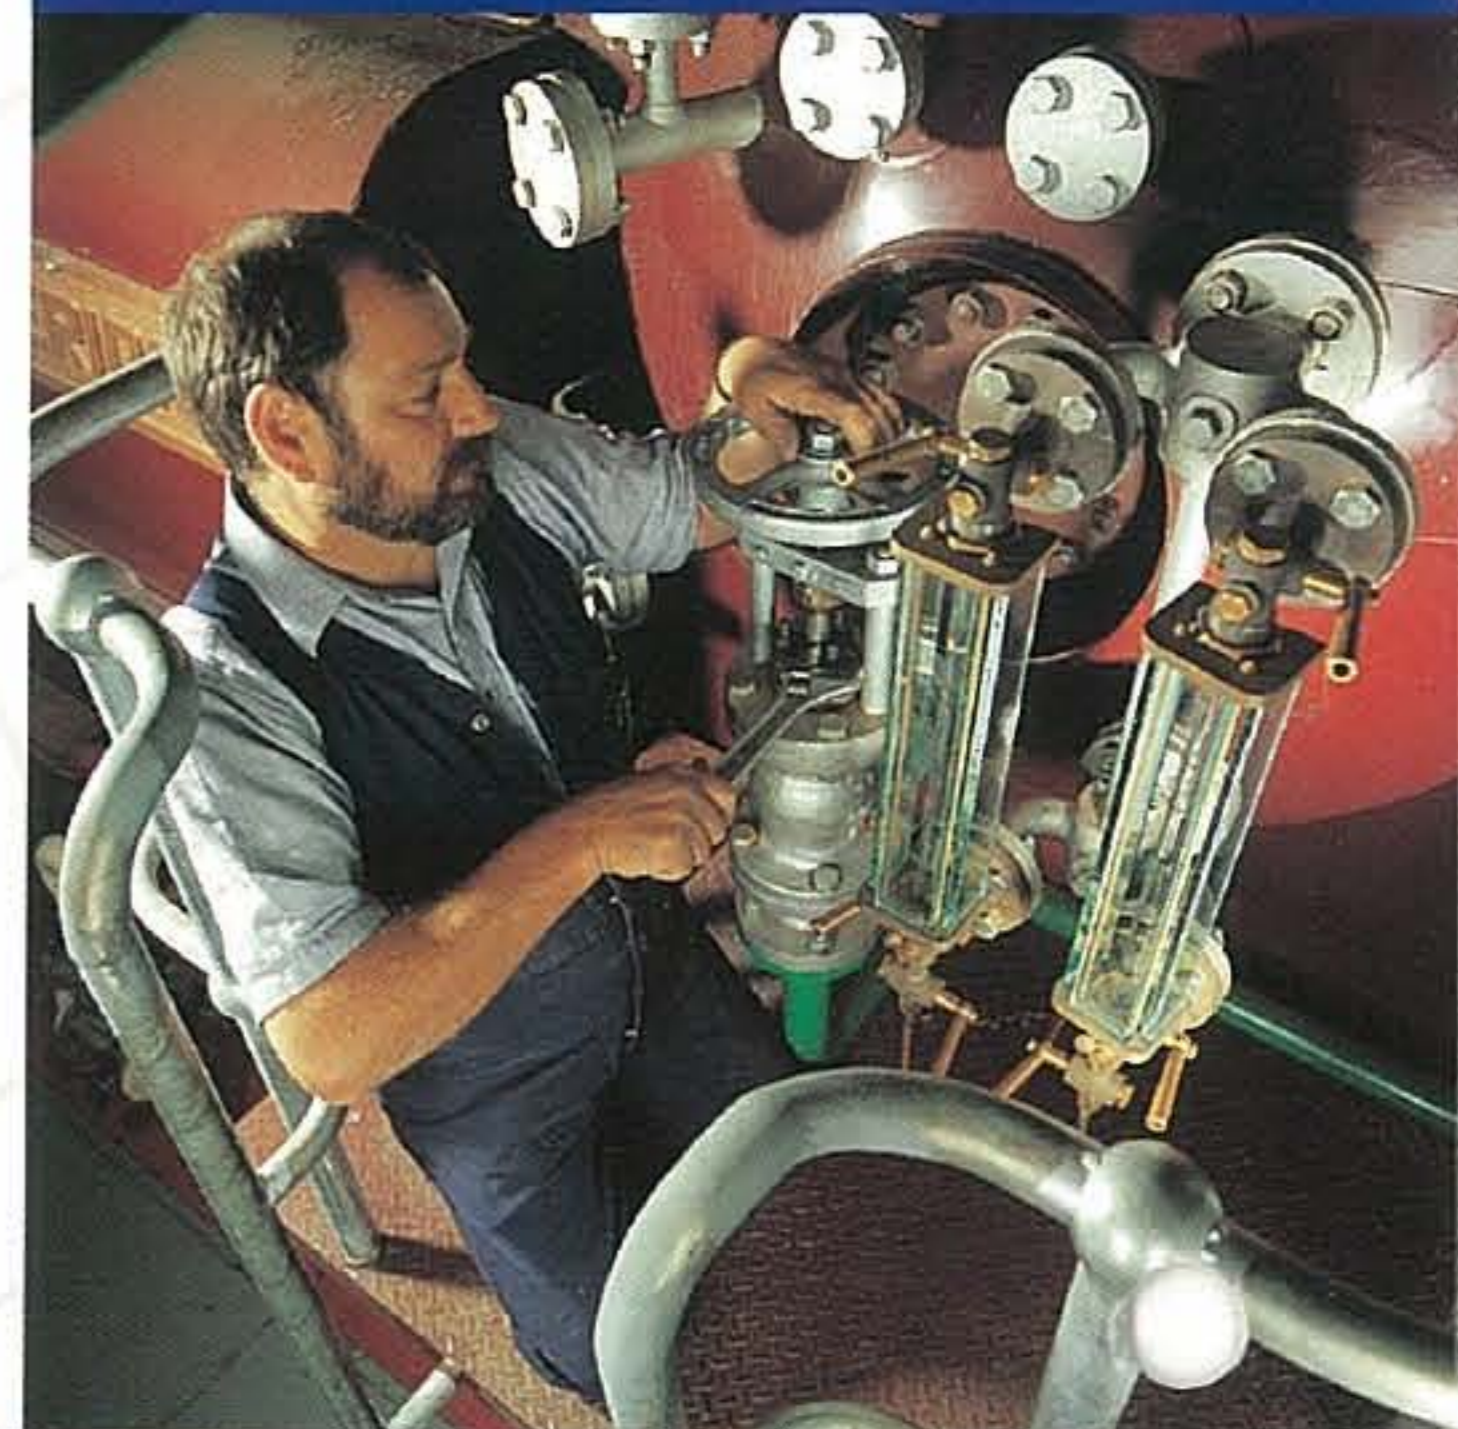

Significant savings on valve replacement

Since its foundation in 1989, Australian Valve and Engineering Pty Limited has established itself as Australia's leading valve reconditioning specialist. Our reputation is based on an ongoing commitment to the delivery of quality, cost effective products, whilst providing comprehensive, personalised service to every customer regardless of size.

Prompt efficient service

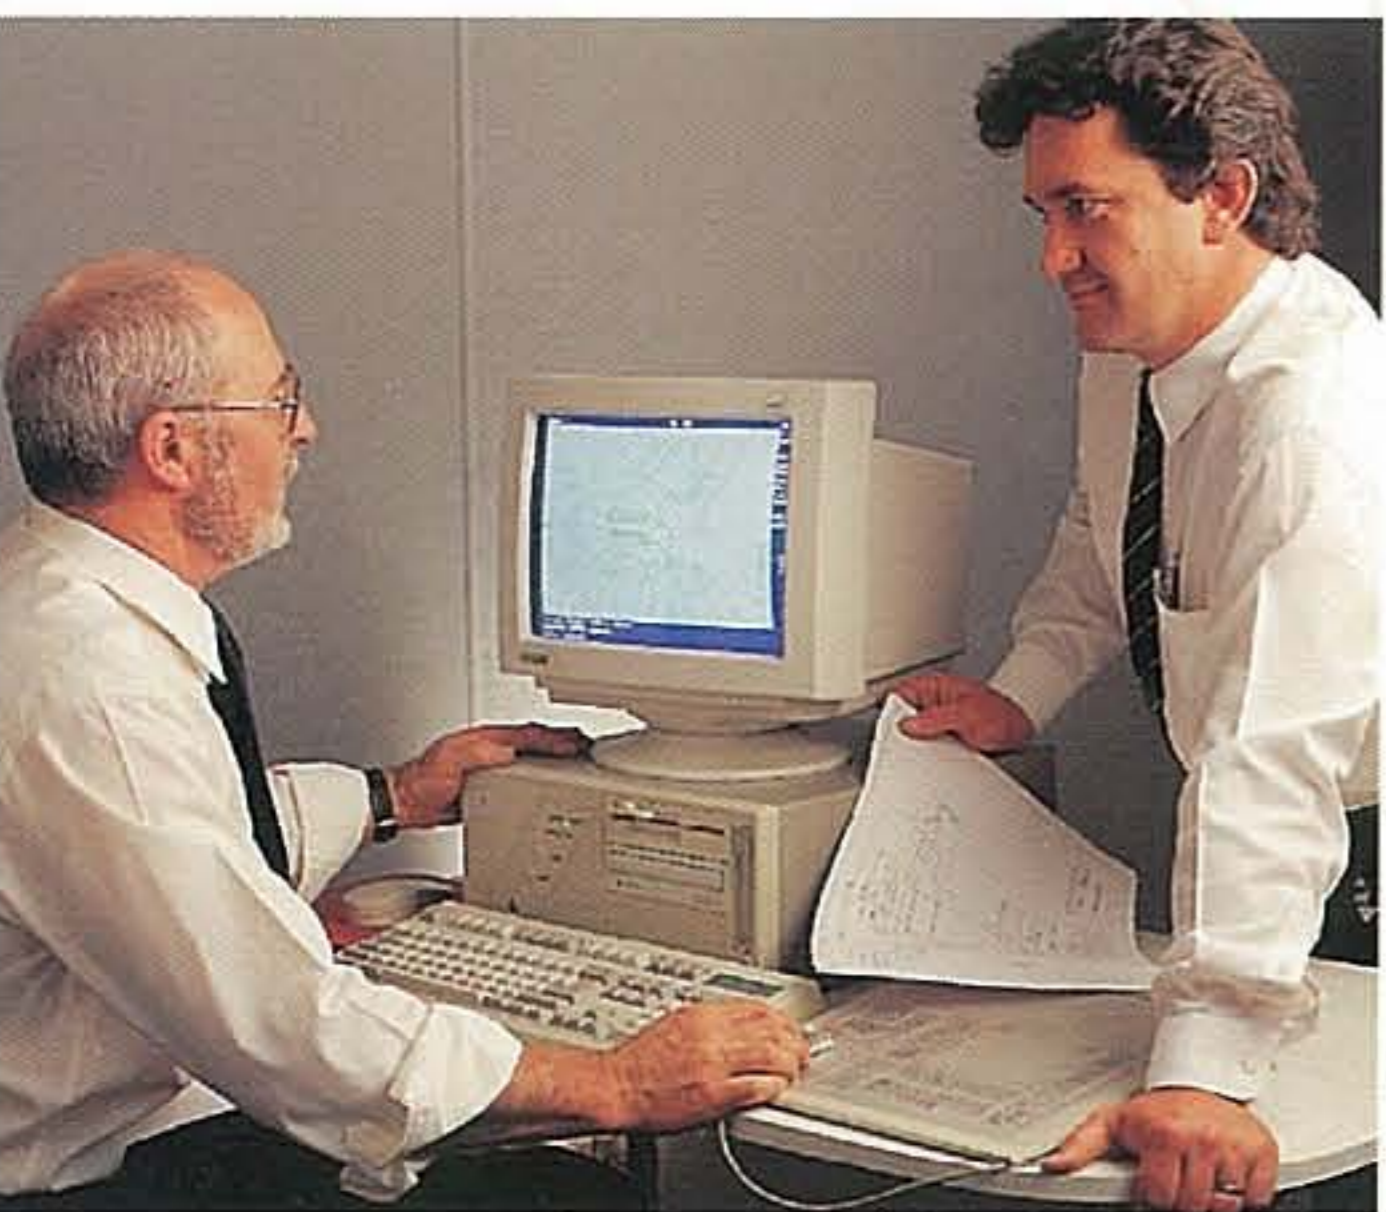

Quality Assurance

To ensure and maintain quality control, all our highly skilled manufacturing and engineering personnel have extensive industry experience. The team at AVE service a wide range of industries from small rural installations, to large multi-national companies involved in the petro-chemical or process industries.

We also offer several other services in addition to specialist valve reconditioning, including a valve design service, engineering support, and valve selection advice.

We can recondition, test and return 'as new' valves at substantially less than new valve cost. All valves are hydrostatically or gas tested in accordance with the relevant application standards, generally API 598, and factory test certificates are supplied.

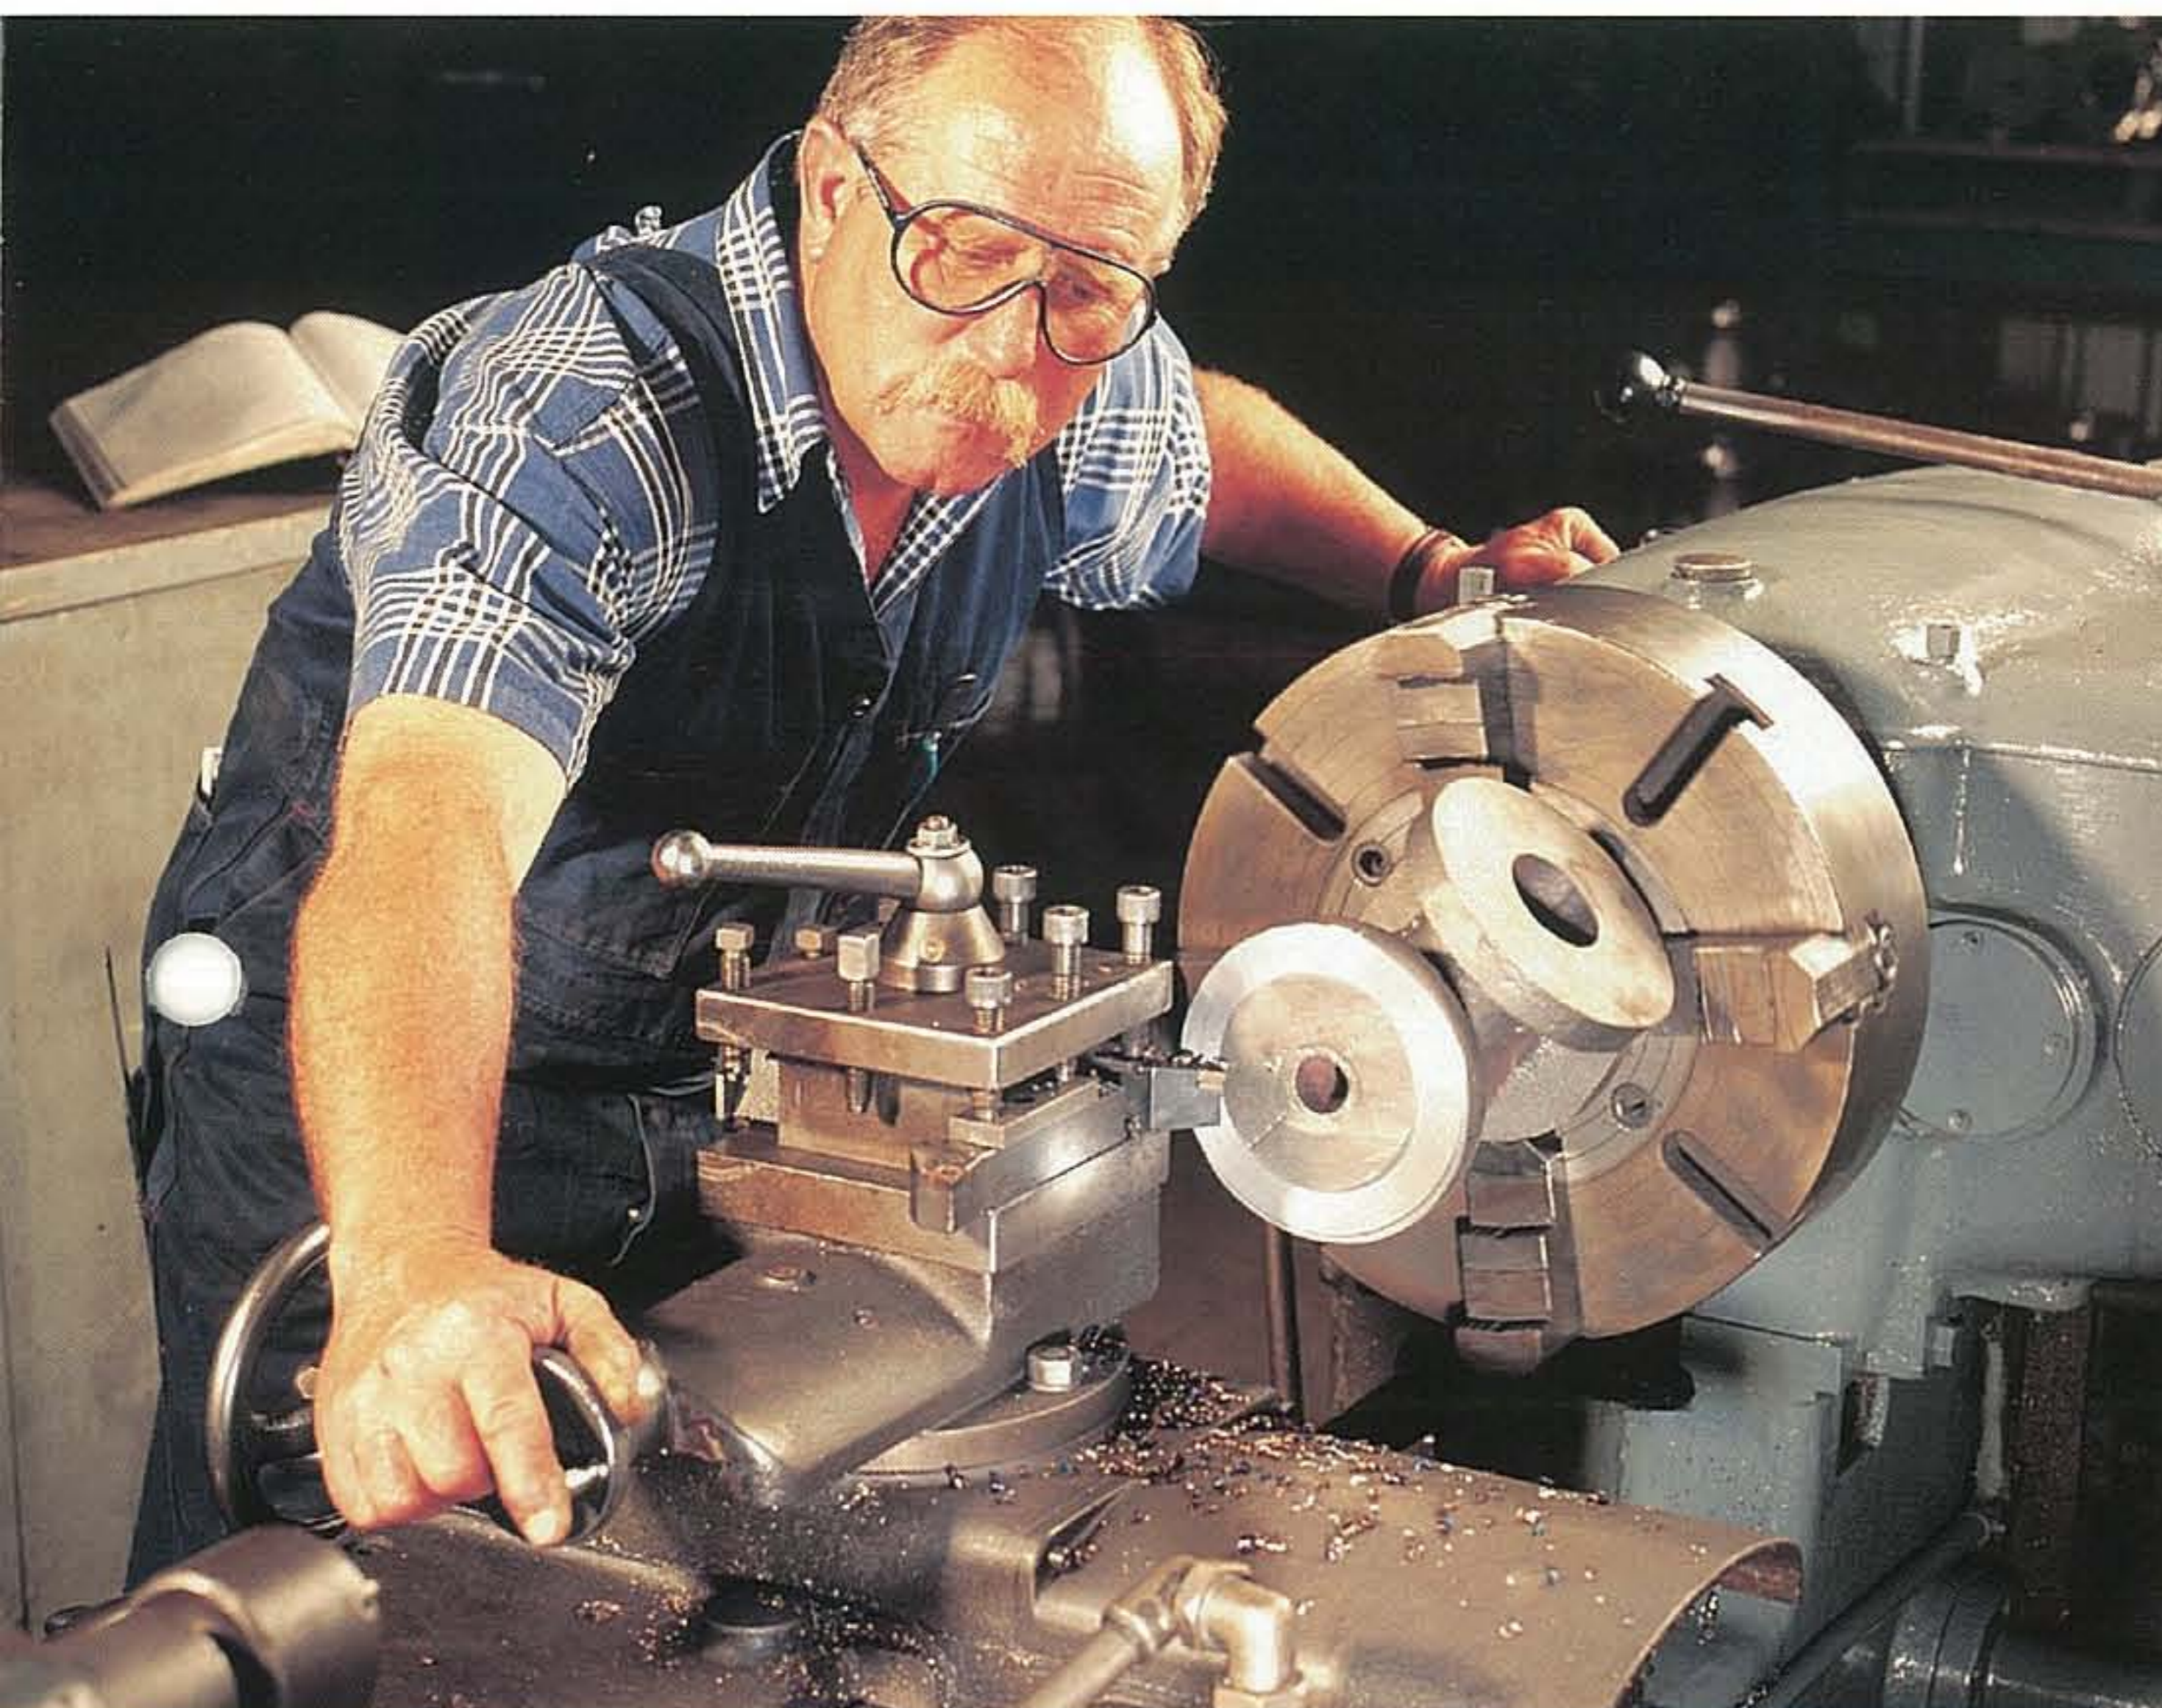

Our stringent quality assurance procedures are based on AS/NZS9002, as are the engineering standards used in the recovery, manufacture and inspection of components and valves. These procedures ensure that AVE delivers high quality products to all customers.

AVE also offers and supplies:

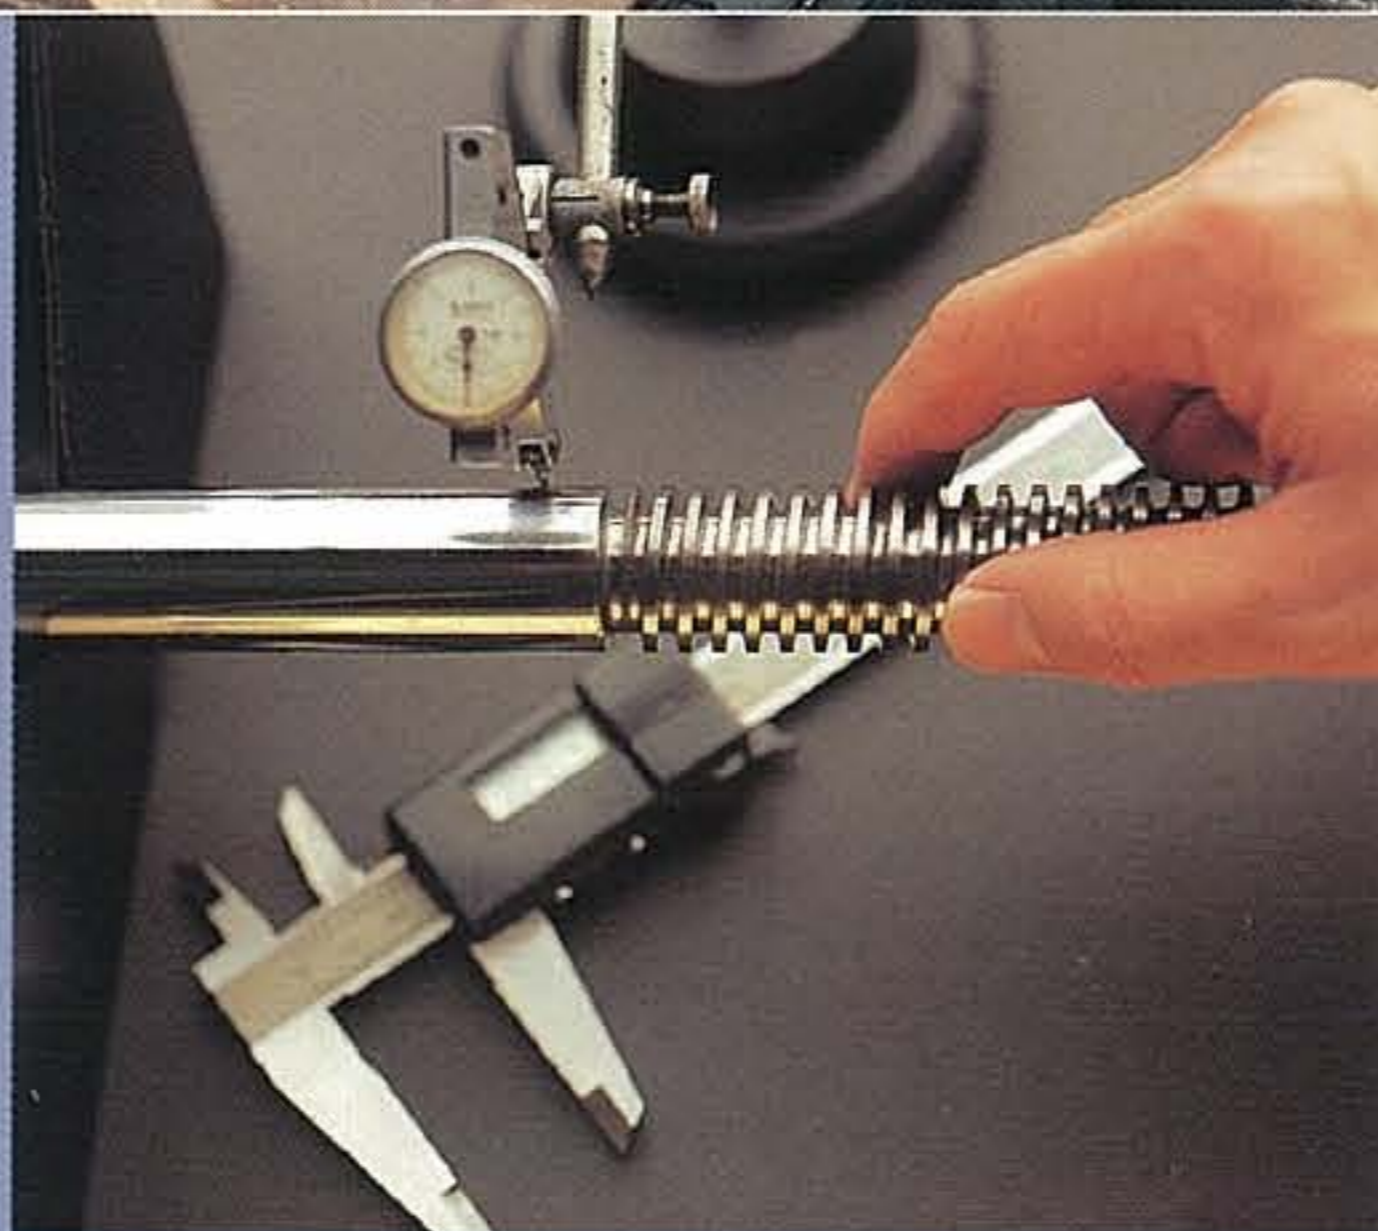

- A large range of new and reconditioned valves
- Valve modification
- Hardfacing and stellite overlay
- Spare parts for all makes
- Valve design and drafting services

Precision engineering

AVE specialises in the reconditioning of all types and makes of valves including:

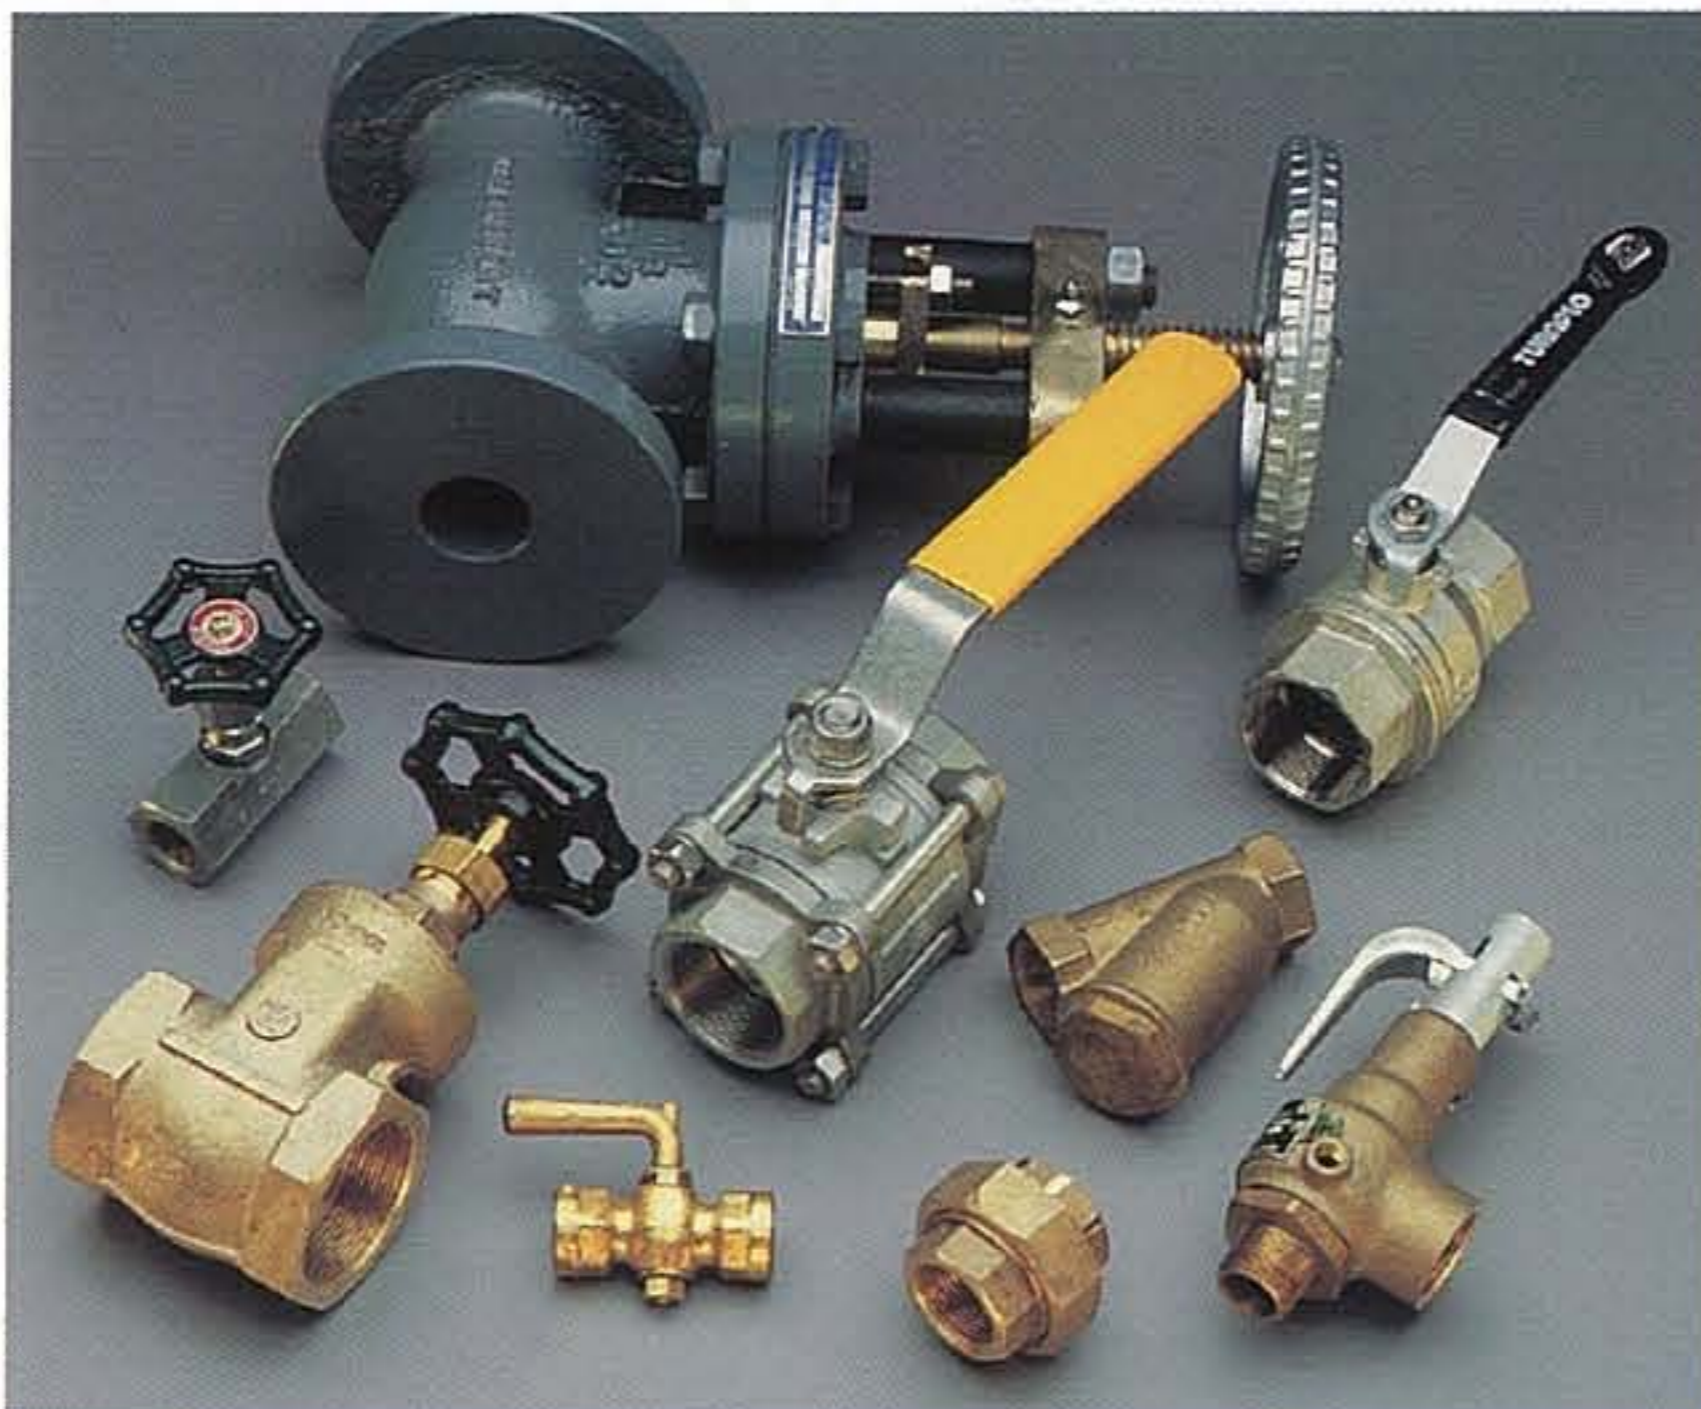

- Gate Valves**
- Globe Valves**
- Check Valves**
- Ball Valves**
- Safety and Safety Relief Valves**
- Pressure Reducing Valves**
- Diaphragm Valves**
- Control Valves**
- Parallel Slide Valves**
- Lubricated Plug Valves**
- Butterfly Valves**
- Sluice Valves**

New valve design service

Our prompt and efficient service ensures minimum disruption to your business. We can also offer a 24-hour turnaround breakdown service.

**Manufacturers
and stockists**

**Australian Valve and Engineering
are stockists and suppliers of
a complete range of:**

BRAEMAR – STG PRODUCTS

BALL VALVES

BUTTERFLY VALVES

SAFETY VALVES

PRESSURE REDUCING VALVES

AVE are manufacturers of:

DREADNOUGHT STEAM VALVES

AND LINE STRAINERS
